I'm a full-stack developer and UI/UX designer with an electrical engineering background. I build with React, Node.js and Spring Boot, and I aspire to design products end to end, from the interface down to the hardware.

Projects

● Software ● Hardware

Swen Cafe

A corporate restaurant app. Customers place orders; admins run the kitchen, finances and user control.

MERN Stack

Convo, a chat app

A full-stack app for secure private and group messaging.

React · Spring Boot · PostgreSQL · Axios · Socket.IO

TCP Network Calculator

A client-server calculator that processes operations over a network through a simple GUI.

Java · Swing · TCP Sockets

Personal Portfolio

A responsive personal website, designed and deployed to showcase my engineering work.

MERN Stack

ALU & 8-Bit Hardware Multiplier

A 4-bit ALU and a simulated synchronous 8-bit shift-and-add multiplier.

Proteus · Digital Logic

Path

Jul 2026 – Oct 2026
MERN Stack Software Developer
SWENITIX TECH (formerly Addis Software)

Jan 2026 – Jun 2026
Competitive Programming
African to Silicon Valley (A2SV)

Expected graduation 2028
BSc, Electrical and Computer Engineering
Addis Ababa University

Skills

Languages
Python, JavaScript, TypeScript, Java, C, Dart

Web & mobile
React, Node.js, Express.js, HTML5, CSS3

Backend & databases
MongoDB, Spring Boot, PostgreSQL, MySQL

Desktop & games
JavaFX, Java Swing, Pygame

Design
Figma, Canva

Dev tools
VS Code, IntelliJ IDEA, Git, GitHub, GitLab
